

Welcome to Raw Bandwidth...

We are an Internet Service Provider specializing in broadband Internet access services for both business and residential customers in the Greater San Francisco Bay Area--San Francisco, Oakland, San Jose, and cities in between and neighboring, including Santa Cruz and up the coast to the Oregon border. We also provide Nationwide Dialup Internet Access services, server colocation in a San Francisco data center (or pure bandwidth to others with their own space in the building), and web hosting and email services suitable for customers anywhere in the world. We are locally owned and operated, have been providing service since 1997, and are a stable company you can count on.
